SHARED DESIGN DNA (EVERY NODE)

— Climate: -45..+70 °C · IP65+ · UV-stable · LiFePO4-preferred · December-sized solar.
— Power: solar-first · 30–90 day autonomy · works with zero grid.
— Field: bear-country mounts · two-person install · hand-tool repair.
— Sovereignty: community-owned mesh · data stays home · OCAP · EN/FR · privacy by design.
— Appropriate tech: right-sized cost · repairable > sealed · open docs.
— Offline dignity: works when everything else has failed — that IS the product.

HOW TO READ THIS SET

— L1 Brick = build-ready (BOM, wiring, electronics, assembly, acceptance test).
— S Mite = prototype-ready (orderable parts, 4 swarm variants, CAD scripted).
— Totem/Anchor = spec-level · Phone = concept · Seed/Meridian = R&D/vision.
— Every product has a FINISH & MATERIALS sheet — final look + materials spec.
— AF-X matrices = every electronic decision — radios, compute, power, displays.
— Every sheet: SURAFEL NEGUSSIE drew it · EMEBET INC. owns it · PROPRIETARY.
